To Whom it May Concern,

I am interested in applying for a position as an interior designer at your company. I am currently a sophomore at Ripon High School and I plan to attend a college to pursue my career in interior design. I will then extend my education further to open my own interior design business. My effort and participation in my work will help show how dedicated I am to this profession and to my clients.

I am currently in the Advanced Art II Class at my high school and completed Art I my freshman year. I have yet to take the online designing class but I will complete that further into my high school career. Committing myself to these art classes has furthered my creativity and skills in the art world. I would value the opportunity to expand my creativity and skills in this position with your team.

Receiving this position as an interior designer for your company will give me opportunities to be excited for, will expand my personal development as an interior designer, and will help to expand my skills in this industry. Hiring me would create a great advantage to your company as you will see my dedication to my clients and how I can offer them the dream designs they strive to achieve. I am extremely passionate about my work, and because of my previous education and experiences with art, I hope you will see my drive to successfully fulfill this position's needs. Thank you for taking the time to consider me for this position. I look forward to speaking with you in the interview process at your convenience.

Sincerely,

Natalie Johnson
